

Functional Requirements				
ID	Description	Priority	Acceptance Criteria	Rationale
FR-001	Staff shall log animal vaccination and medical intake records, updating status to 'Ready for Adoption'	High	Pass: record linked to verified animal profile; Fail: animal under quarantine marked adopted	Prevents unsafe or premature adoptions
FR-002	Applicants shall search/filter the pet catalog by species, age, breed, and temperament	High	Pass: filtered results return in <200ms; Fail: results include animals not matching filter	Core discovery feature for applicants
FR-003	System shall allow applicants to submit an adoption questionnaire tied to a specific animal	High	Pass: application stored with applicant ID + animal ID; Fail: duplicate active applications allowed for same animal	Captures applicant intent and screening data
FR-004	Staff shall review submitted applications and approve/reject with a documented reason	Medium	Pass: status change logged with staff ID and timestamp; Fail: status changes without audit trail	Accountability in the approval process
FR-005	System shall allow staff to schedule and track foster home placement timelines, including start/expected-return dates	Medium	Pass: overlapping placements for one animal blocked; Fail: two active placements allowed for same animal	Prevents scheduling conflicts in foster care
Non Functional Requirements				
ID	Description	Priority	Acceptance Criteria	Rationale
NFR-001	Performance & Security - Pet search catalog must support multi-attribute filtering with page response <200ms, over encrypted (HTTPS) connections	High	Pass: benchmarks confirm latency and TLS under peak simulated load; Fail: any unencrypted endpoint or >200ms response	Ensures usable, secure browsing experience

NFR-002	Reliability & Availability - System shall maintain 99.5% uptime and ensure no medical/intake record is lost on failure (data durability)	High	Pass: recovery test shows zero record loss after simulated crash; Fail: any data loss on failover	Medical records are safety-critical and cannot be lost
